

LENGTH: 1.0 Hour

CREDITS: 1 LU | HSW

HSW: Yes

DESCRIPTION

Of the total gypsum board installed in a building, typically 60-75% of the material is visible in the building's completed state as wall and ceiling surfaces. When installed and finished correctly, the gypsum board is not noticed because of other products, like paint or wallcoverings, that cover it. The presentation provides guidelines and industry approved practices to achieve the best possible gypsum board installations. The presenter will share technical information to answer common questions from the architectural community on the best specification methods and installation procedures for constructing successful gypsum board assemblies. Industry documents, noting correct job site conditions and installation practices, will be reviewed.

LEARNING OBJECTIVES

- Attendees will receive an overview of common application questions from architects related to gypsum board products.
- Presentation will share how to inspect job sites using industry approved information and available industry tools that educate architects, specifiers and construction administrators on industry accepted installation methods and solutions to remediate faulty installations. allowing specifiers and architects to educated, responsive and factually correct
- Presentation will share how governing bodies like ASTM, the Gypsum Association and the Drywall Finishing Counsel support good practices in application.
- Presentation will review best practices for gypsum board installation and product/job site conditions to be avoided.

HOW TAUGHT

Courses are taught onsite or virtually using a PowerPoint presentation. Samples, test data and exercises are used based on the topic of discussion.

TECHNOLOGY REQUIREMENTS

Projection capabilities for the PowerPoint presentation. Power, HDMI, WiFi

TARGETED AUDIENCE

Architects, Specification Writers, Design Professionals, Facility Managers, School Boards, Architecture and Design Students, Building Owners, etc. This program meets every experience level, with time designed into the program for questions and answers.

FACILITATOR QUALIFICATIONS

National Gypsum Certified Presenters only.

COST

There is no cost for this program.

OTHER

NGC offers Certificates of Participation for reciprocating association members.
