

LENGTH: 1.0 Hour

CREDITS: 1 LU | ELECTIVE

HSW: Yes

DESCRIPTION

Sustainability and Green Building Practices are transforming the Built Environment. Industry reports estimate over 60% of all projects have baseline sustainable requirements. LEED and other green rating systems have specific language that needs to be communicated, but how? The presentation will walk through tips and best practices to improve communication and required documentation in specifications.

LEARNING OBJECTIVES

- Identify the historical changes created by meeting new standards required by LEED rating system.
- Review the LEED credit requirements and list acceptable sustainable documents needed to achieve credit compliance.
- Outline and quantify the evolution of the LEED rating system and codes that necessitate additional communication for sustainable design requirements.
- Provide best practice guidelines on document development to appropriately communicate sustainable design requirements.

HOW TAUGHT

Courses are taught onsite or virtually using a PowerPoint presentation. Samples, test data and exercises are used based on the topic of discussion.

TECHNOLOGY REQUIREMENTS

Projection capabilities for the PowerPoint presentation. Power, HDMI, WiFi

TARGETED AUDIENCE

Architects, Specification Writers, Design Professionals, Facility Managers, School Boards, Architecture and Design Students, Building Owners, etc. This program meets every experience level, with time designed into the program for questions and answers.

FACILITATOR QUALIFICATIONS

National Gypsum Certified Presenters only.

COST

There is no cost for this program.

OTHER

NGC offers Certificates of Participation for reciprocating association members.
