Partnering in the evolution of design.
Tools, services and support for architects.
More than 90 years of innovative products that exceed customer expectations.

- Fully integrated building products manufacturer founded in 1925.
- Nearly 40 operating plants, mines, quarries and support facilities throughout the United States and Canada.
- Leader in developing innovative and sustainable products.
- Reputation for outstanding quality, service and support.
Your single source for a complete portfolio of products, including:

- Gold Bond® BRAND gypsum board, including the PURPLE® XP® family of drywall products.
- eXP® fiberglass-faced interior and exterior gypsum panels.
- DEXcell® BRAND, a new family of high-performance roof boards for commercial roofing systems.
- ProForm® BRAND drywall finishing products.
- PermaBase® BRAND cement board products.

Proprietary research and development set us apart.

- State-of-the-art Technology Innovation Center.
- Dedicated laboratories for fire and acoustical testing.
- Superior engineering and the latest technical advancements in building science keep our partners at the forefront of industry trends.

Unrivaled design support is just a phone call (or office visit) away.

- LEED-accredited construction design managers and architects.
- Local construction design manager can edit specifications and review drawings.
- Assist with product selection for specific projects.
- Online access to technical downloads and design information.

Flexible continuing education services.

- A registered continuing education provider.
- Online courses and in-person training.
- Many courses available online, 24/7, including product application, technical standards or LEED v4.
- Lunch ’N Learn training about specific products and building trends.
- Accredited to award AIA and GBCI credits (1 LU HSW credit/course).
Technical resources at your fingertips.

- Online library of high-quality Building Information Modeling (BIM) objects and Computer Aided Design (CAD) files.
- Web-based tools for evaluating product technical information, including submittal pages, guide specifications and safety data sheets.
- Green Product Score (GPS) online resource used to assess LEED credit capabilities for regional materials and recycled content.

Design with the environment in mind.

- National Gypsum employs the highest level of ecological responsibility and resource-efficient technology.
- Offering products manufactured to achieve GREENGUARD vCertification, the most stringent standard for indoor air quality in the United States.
- A portion of our gypsum board is made from a process used to remove sulfur dioxide from emissions at coal-fired power plants.
- 100% of our gypsum board face and back paper is produced with post-consumer recyclable content.
- We help you meet the demands for green programs and credits such as USGBC LEED 2009 and LEED v4.

We’re not just a product manufacturer, we’re a design partner.

- Strategic nationwide network of manufacturing facilities allows us to provide the best in customer service.
- Construction Design Managers can review your plans, drawings and troubleshoot problems immediately.
- Call 1-800-NATIONAL® to talk directly to a technical expert with up-to-date knowledge of specifications, building codes, product information and much more.
